SKINCARE SERVICES

Millicent Audain, CIDESCO, LMT, NCTMB

Millicent Audain has over 25 years experience as an aesthetician and holds the internationally recognized CIDESCO aesthetic diploma. She personally experienced years of acne and problem skin before professional facial treatments changed her life.

Millicent constantly explores and researches treatments and ingredients used throughout the world to stay abreast of the most effective products available. Only treatments with extensive clinical documentation and proven track records are used. It is essential for her to understand the science and chemistry behind clinically formulated products, and share her knowledge as part of your treatment. She makes it a priority to cut through the marketing hype surrounding skin care and explain why professional home care is far superior to high end mass market and multi-level marketing products.

Ongoing education in the fields of aesthetics, nutrition, fitness, healthy living and the healing arts keep Millicent passionate about her skin care practice. She is also a nationally certified massage therapist and a Level 3 Reiki healer. She follows a plant-based diet, loves Pilates and movement of all kinds, as well as books, music, films and her Vitamix™. She has never owned a television but has come to rely on her MAC and cell-phone! She loves working with anyone interested in the health of their skin and well-being.

All treatments blend patented advanced technologies where applicable and customized products. Skin analysis and home care advice is included in every treatment. **All treatments are tailored to suit individual concerns at the time of your treatment.**

FACIAL TREATMENTS

ALL facial treatments will include a plant based enzyme and/or a MILD chemical peel. These are designed to enhance cell turnover and gently unclog pores revealing brighter, clearer skin. All treatments also include a specialized mask suited for the specific concerns of the skin.

BLENDED MODALITY TREATMENTS

INITIAL: (For ALL first time clients): This the “meet and greet” treatment for your skin. Includes a thorough skin analysis and health consultation. The facial will include the appropriate blended modalities and active products as well as a hand and foot massage. A specific home care treatment plan will be prescribed. (Please bring all skin care products you currently use to this appointment). **\$190.00**

ULTIMATE: Customized blended modalities with active serums, powder blends and intensive masks to target specific concerns. This treatment blends relaxation and therapeutic emphasis by including hand and foot massage. **\$280.00**

POWER: Strictly therapeutic treatment (no massage) with blended modalities and custom crafted active serums, powder blends and intensive masks. **\$230.00**

SINGLE MODALITY TREATMENTS

TAMA™ MICROCURRENT: Features the Ultimate or Red Carpet Lift micro current protocol. Includes enzyme treatment and intensive mask therapy. **\$190.00**

REVITA - PEN™: Customized stem cell serums/powder blends infused into the skin via the micro-channels created by the Revita - Pen. Includes enzyme treatment and intensive mask therapy. **\$180.00**

FACIAL INFUSION: Customized stem cell serums/powder blends massaged into the skin to address specific concerns. Scented warm steam towels are used to enhance absorption. Includes enzyme treatment and mask therapy as well as hand and foot massage. There is no equipment used in this treatment. **\$170.00**

LIGHT STIM LED™: Full face treatment of LED light panels with enzyme treatment and intensive mask therapy. **\$150.00**

~ add Dermaplane to Single Modality treatment: **\$15.00**

MODALITIES

TAMA™ Microcurrent - patented Shambayati Multimode Waveform (M²W)™ technology. The intelligent circuitry at the heart of the TAMA™ device measures each person's unique tissue composition and adapts the stimulation parameters to optimize the treatment at specific depths of the face. Promotes lifting, tightening, firming and relaxing of facial muscle and tissue.

Revita Pen - patented motorized tool with a disposable spherical tip that oscillates across the skin creating microscopic channels in the epidermis. The customized powder/serum blend is then able to penetrate much deeper for optimal results.

Light Stim™ LED Light - A full face panel of LED light helps promote collagen and fibroblast production in the skin as well as reducing inflammation.

Dermaplane - removes superficial dead skin cells as well as vellus hair (peach fuzz); cleans up brow hairs and upper lip hair.

**A blend of these will be chosen specifically for each client. Usually 2 - 4 modalities are used, depending on the client's skin type and tolerance.*

Osmosis

+PÜR MEDICAL SKINCARE

Osmosis focuses on reducing inflammation and rebalancing through our inside-out approach, resulting in permanent positive changes.

Osmosis Skincare restores skin health by improving the skin's immune and repair functions, accelerating collagen production, enhancing the delivery of skin nutrition and restoring skin texture.

The addition of 150+ stem cell growth factors, potent anti-inflammatory ingredients and DNA repair technology complete the transformation and allow your skin to restore its youth in dramatic fashion.

TAMA MICROCURRENT:

"A Non-Surgical Face Lift"

TAMA Microcurrent is a form of electrical massage that allows your face to attain better health naturally. This non-invasive, holistic modality is closest to the body's own healing state, promoting homeostasis through rebalancing of ionic transport in the epidermis, dermis and subcutaneous layers of the skin. TAMA's unique **Multi-Mode Waveform** stimulation provides simultaneous muscle toning and re-education, thus providing both short- and long-term benefits without inflammation.

No other aesthetic service can come close to these proven results:

- Diminish appearance of fine lines and wrinkles
- Improve circulation
- Clear up / reduce acne
- Improve muscle tone in face, neck and hands
- Lift jowls and eyebrows
- Calm rosacea
- Drain lymphatic nodes
- Treat sun damage
- Improve skin pigmentation
- Facilitate product penetration
- Tighten large pores, resulting in smoother and firmer skin
- Revitalize the skin
- Improve elasticity

TAMA™ Microcurrent Boot Camp

30 - 40 minutes (not a facial)

Designed to be used as a series of weekly or twice weekly treatments for achieving the quickest and most obvious results from Microcurrent.

12 Sessions - \$1,200 (must pre-pay)

To be used within 12 - 14 weeks, maximum.

No refunds or substitutions on unused sessions.

Individual Session - \$130

(can be done at anytime)
